

Flooding and Wells Advisory

Hastings Prince Edward Public Health warns:

DO NOT DRINK WELL WATER in flood areas

The risk of contamination to wells is high in flooding situations. If you even suspect your well is impacted by flooding **DO NOT DRINK THE WATER**. **This warning does not apply to municipal drinking water systems.**

- Use an alternate water source, e.g. bottled water, for drinking and other domestic purposes.
- Test your drinking water once flood levels have receded.
- Hastings Prince Edward Public Health can provide instructions on how to disinfect your well after flood waters recede.
